

# GEOHERMAL ENERGY PRESERVES THE ENVIRONMENT, CREATES JOBS, AND IMPROVES LIVES ACROSS THE UNITED STATES AND AROUND THE WORLD.

## WHO IS GEA?

The Geothermal Energy Association is a trade association composed of U.S. companies who support the expanded use of geothermal energy and are developing geothermal resources worldwide for electrical power generation and direct-heat uses.

GEA advocates for public policies that will promote the development and utilization of geothermal resources, provides a forum for the industry to discuss issues and problems, encourages research and development to improve geothermal technologies, presents industry views to governmental organizations, provides assistance for the export of geothermal goods and services, compiles statistical data about the geothermal industry, and conducts education and outreach projects.

Our members have offices or operations in many states and in numerous countries throughout the world.

## GEOHERMAL ENERGY WEEKLY AND REPORTS:

### GEA PUBLICATIONS

The Geothermal Energy Weekly (formerly GEA Weekly Update) is the Geothermal Energy Association's electronic newsletter and the most widely circulated weekly in the geothermal industry. The newsletter provides updates on the national, state, and international levels, and includes news from GEA member companies. Upcoming events, job opportunities, and Requests for Proposals are also found here.

GEA also provides reports on the state of the geothermal industry on topics ranging from technology, jobs, costs, and environment, to a twice-yearly detailed survey report on current production and development of geothermal power plants in the U.S.

## ANNUAL GEOHERMAL ENERGY EXPO AND OTHER GEOHERMAL EVENTS

Our mission is to conduct education and outreach projects and events that provide a forum for the industry to discuss issues and problems. Our events are educational in nature, with the top experts in the industry, while also maintaining a business networking environment that we find key in a successful event.

Every year, the Geothermal Energy Expo hosts the world's largest gathering of vendors providing support for geothermal resource exploration, characterization, development, production and management. It provides a unique opportunity for exhibitors to showcase their projects, equipment, services and state of the art technology to the geothermal community.

## MEMBERSHIP

At GEA, we represent companies and individuals who are part of the fast-growing geothermal energy industry. We embody a wide variety of members ranging from industry developers to investors and other supporters. We are interested in providing our members with the most relevant and up-to-date information on what is going on in the geothermal industry today and the factors that shape the industry for tomorrow.

Your participation is critical as we endeavor to expand the use of this clean, renewable, and sustainable energy source. Geothermal has the potential to preserve the environment, create jobs, and increase domestic clean energy production.
